Current weather:
- Dark Blue Nav Bar
- Write what the phase is for icon for moon
- We need one more card for 7 day mini weather
- Make information card horizontal across page
- Use if statement — non detailed forecast, if partly cloudy do partly cloudy image.
  - this should fix cloudy bug. (sunny, partly cloudy, cloudy)
- Don't say it is and put temperature spelled right
- Hourly forecast to be added to the current weather page in a card.
- Wind icon DOESN'T change
-

Register page: Update based on login page
- You can register with the same username but not same passcode
- Make it so you cannot register without a zip code of 5 numbers

Login page: set z index to everything from the nav bar to 1000.
- Change color for login page its boring
- Message for failed login. Don't go straight to register.

Logout page: set z index of everything but nav bar to large.

Navbar: Hamburger menu on left, logout button on right change color its ugly, capybara in corner

7 day weather page update. Put each daily section into a card (7 cards with hourly forecast going down)

Capybaras – in images. In Progress
Nav Bar Update:
Weather Facts
Weather Quiz
Current Weather

One

Icons correct for weather: icons for all weather types potentially. Icon for login and logout needed and icon for nav bar.
Snow, Light Snow, Clear, Partly Cloudy (make specific one)
Tie location to API – make the default boulder – can we just ask zip code. How to translate that into latitude and longitude

Potential for one written response page? But it doesn't seem necessary.
